

New Stem Cells on the Block

Researchers have for the first time produced human embryonic stem cells (hESCs) using somatic nuclear transfer (SCNT), a method in which the nucleus of a donor cell—in this case a skin cell or fibroblast—is transferred to an egg cell whose own nucleus has been removed.

The work, published in Cell, opens up the possibility of an alternative source of patient-specific stem cells to help scientists understand disease and develop personalized cell-based therapies. What's more, hESCs produced via nuclear transfer (NT-hESCs) may not have the genetic and epigenetic abnormalities found in induced pluripotent stem cells (iPSCs), made by adding key genes to reprogram adult cells.....

[GENTAUR](#) offers you a way to homogenize, disrupt, or lyse up to 24 tissue or cell culture samples at a time + keeping your samples cool.

***The Bullet Blender Family**

[BB24-AU Bullet Blender GOLD NEW!](#) - 5873 EUR

[BB50-DX-CE Bullet Blender 50-DX homogenizer, CE certified, air cooling and noise insulation](#)-3830 EUR

[BBX24-CE Bullet Blender homogenizer, CE certified, for up to 24 tissue cell samples](#) - 2500 EUR

***PAG-Electrophoresis? [GENTAUR](#) offers you the full equipment!**

[AE-6500 Dual Mini Slab & MANY MORE](#) [HERE](#)

***[WE](#) can provide you with the [unique ready to use kits with special cell cultures](#).**

[CacoGoblet 24 KRECE-CCG01](#) - 1295 EUR

[CacoGoblet 96 KRECE-CCG50](#) - 2255 EUR

CacoGoblet, allows in vitro intestinal absorption evaluation of drug targets in a barrier physiologically closer to the intestinal epithelium.

[CacoReady 24 Express KRECE-CCR10](#) - 1355 EUR

[CacoReady 96 KRECE-CCR50](#) - 1995 EUR

CacoReady™ Allows in vitro intestinal absorption evaluation of drug targets.

[IsoCypTox Individual \(3A4, 2E1, 1A2, 2A6\) KRECE-ICT51, -ICT52, -ICT53, -ICT54](#) - 945 EUR

IsoCyp-Tox allows in vitro detection and screening of biotransformation-mediated toxicity of lead and drug targets in just one single experiment.
